KAP-CHECK™ TORQUE MONITOR

IN-LINE AUTOMATIC DIGITAL TORQUE MONITORING

Displays:

- Torque
- Upper Limit
- Target
- Lower Limit
- Cap Size
- BPM

The **Kap-Check**™ Model KC15 Digital Torque Monitor is a fully automatic, PLC controlled, inline, torque measuring system. This unit is a perfect option for your new SureKap Capper or it can easily be added to your existing SureKap Capper or Retorquer.

Measures the final application torque on every container while continually displaying bottles per minute count. Easily alerts operator of a high or low torque condition.

Key Features:

- Large LCD Display
- Non-Contact Torque Sensor (low maintenance)
- Color Touchscreen PLC
- USB Jack to save data to flash drive
- Built in Thermal Printer
- Built in Audible and Visual Indicators
